Springer International

Applied Microbiology and Biotechnology

Founded as European Journal of Applied Microbiology in 1974 (Founding editor: H.-J. Rehm). As of volume 5(1977) under the title European Journal of Applied Microbiology and Biotechnology. As of volume 19(1984) the title was changed to Applied Microbiology and Biotechnology.

Copyright

Submission of a manuscript implies: that the work described has not been published before (except in the form of an abstract or as part of a published lecture, review, or thesis); that it is not under consideration for publication elsewhere; that its publication has been approved by all coauthors, if any, as well as by the responsible authorities at the institute where the work has been carried out; that, if and when the manuscript is accepted for publication, the authors agree to automatic transfer of the copyright to the publisher; and that the manuscript will not be published elsewhere in any language without the consent of the copyright holders.

All articles published in this journal are protected by copyright, which covers the exclusive rights to reproduce and distribute the article (e.g., as offprints), as well as all translation rights. No material published in this journal may be reproduced photographically or stored on microfilm, in electronic data bases, video disks, etc., without first obtaining written permission from the publisher.

The use of general descriptive names, trade names, trademarks, etc., in this publication, even if not specifically identified, does not imply that these names are not protected by the relevant laws and regulations.

While the advice and information in this journal is believed to be true and accurate at the date of its going to press, neither the authors, the editors, nor the publisher can accept any legal responsibility for any errors or omissions that may be made. The publisher makes no warranty, express or implied, with respect to the material contained herein.

Special regulations for photocopies in the USA: Photocopies may be made for personal or in-house use beyound the limitations stipulated under Section 107 or 108 of the U.S. Copyright Law, provided a fee is paid. This fee is US $ 0.20 per page per copy, plus a basic fee of US $ 2.00 per article. All fees should be paid to the Copyright Clearance Center, Inc., 21 Congress Street, Salem, MA 01970, USA, stating the ISSN 0175-7598, the volume, and the first and last page numbers of each articles copied. The copyright owner's consent does not include copying for general distribution, promotion, new works, or resale. In these cases, specific written permission must first be obtained from the publisher.

Contents of volume 37

No. 1 (pp 1–140) published April 1992
No. 2 (pp 141–280) published May 1992
No. 3 (pp 281–410) published June 1992
No. 4 (pp 411–532) published July 1992
No. 5 (pp 533–690) published August 1992
No. 6 (pp 691–832) published September 1992

Original papers

Aasen IM, Folkvord K, Levine DW: Development of a process for large-scale chromatographic purification of an alginate lyase from *Klebsiella pneumoniae* 55

Ahmad S, Johri BN: Immobilization of *Rhodococcus equi* DSM 89-133 onto porous celite beads for cholesterol side-chain cleavage (Short Contribution) 468

Akiyama M, Taima Y, Doi Y: Production of poly(3-hydroxyalkanoates) by a bacterium of the genus *Alcaligenes* utilizing long-chain fatty acids 698

Alfafara C, Miura K, Shimizu H, Shioya S, Suga K: Cysteine addition strategy for maximum glutathione production in fed-batch culture of *Saccharomyces cerevisiae* 141

Allison C, Macfarlane GT: Physiological and nutritional determinants of protease secretion by *Clostridium sporogeneses:* characterization of six extracellular proteases 152

Al-Rubeai M, Emery AN, Chalder S: The effect of Pluronic F-68 on hybridoma cells in continuous culture (Short contribution) 44

Angelidaki I, Ahring BK: Effects of free long-chain fatty acids on thermophilic anaerobic digestion 808

Arcangeli JP, Arvin E: Toluene biodegradation and biofilm growth in an aerobic fixed-film reactor 510

Arendt EK, Hammes WP: Isolation and characterization of *Leuconostoc oenos* phages from German wines 643

Atienza J, Hernandez E, Primo J: Isolation and identification of ethisolide as an antibiotic product from *Penicillium capsulatum* 298

Auburger G, Winter J: Purification and characterization of benzoyl-CoA ligase from a syntrophic, benzoate-degrading, anaerobic mixed culture 789

Ayub MAZ, Astolfi-Filho S, Mavituna F, Oliver SG: Studies on plasmid stability, cell metabolism and superoxide dismutase production by Pgk$^-$ strains of *Saccharomyces cerevisiae* 615

Banat IM, Nigam P, Marchant R: The isolation and characterisation of a salicylate-hydroxylase-producing strain of *Pseudomonas putida* 378

Bestetti G, Galli E, Leoni B, Pelizzoni F, Sello G: Regioselective hydroxylation of chlorobenzene and chlorophenols by a *Pseudomonas putida* 260

Beuvink JMW, Spoelstra SF: Interactions between substrate, fermentation end-products, buffering systems and gas production upon fermentation of different carbohydrates by mixed rumen microorganisms in vitro 505

Bhalla TCh, Miura A, Wakamoto A, Ohba Y, Furuhashi K: Asymmetric hydrolysis of α-aminonitriles to optically active amino acids by a nitrilase of *Rhodococcus rhodochrous* PA-34 184

Bonnarme P, Delattre M, Corrieu G, Asther M: Activation of lignin and manganese peroxidase excretion in *Phanerochaete chrysosporium* by fungal extracts 670

Bourque D, Ouellette B, André G, Groleau D: Production of poly-β-hydroxybutyrate from methanol: characterization of a new isolate of *Methylobacterium extorquens* 7

Braun M, Kim JM, Schmid RD: Purification and some properties of an extracellular L-amino acid oxidase from *Cellulomonas cellulans* AM8 isolated from soil 594

Brinkmann U, Babel W: Simultaneous utilization of heterotrophic substrates by *Hansenula polymorpha* MH30 results in enhanced growth rates 98

Bryant FO, Wiegel J, Ljungdahl LG: Comparison of alcohol dehydrogenases from wild-type and mutant strain, JW200 Fe 4, of *'Thermoanaerobacter ethanolicus'* 490

Buchert J, Ranua M, Kantelinen A, Viikari L: The role of two *Trichoderma reesei* xylanases in the bleaching of pine kraft pulp 825

Bussink HJD, Hombergh JPTW van den, IJssel PRLA van den, Visser J: Characterization of polygalacturonase-overproducing *Aspergillus niger* transformants 324

Castillo Agudo L del: Lipid content of *Saccharomyces cerevisiae* strains with different degrees of ethanol tolerance 647

Chung DK, Chung SK, Batt CA: Antisense RNA directed against the major capsid protein of *Lactococcus lactis* subsp. *cremoris* bacteriophage 4-1 confers partial resistance to the host 79

Cselovszky J, Wolf G, Hammes WP: Production of formate, acetate, and succinate by anaerobic fermentation of *Lactobacillus pentosus* in the presence of citrate 94

Daniel M, Choi JH, Kim JH, Lebeault JM: Effect of nutrient deficiency on accumulation and relative molecular weight of poly.β-hydroxybutyric acid by methylotrophic bacterium, *Pseudomonas* 135 702

Daniel M, Barbotin JN, Kim JH, Lebeault JM: Partial purification and characterization of β-hydroxybutyric acid dehydrogenase of a methylotrophic bacterium, *Pseudomonas* 135 707

Davis RA, DeRuiter J: Comparison of the catalytic and inhibitory properties of *Pachysolen tannophilus* xylose reductase to rat lens aldose reductase 109

Davis S, Burns RG: Covalent immobilisation of laccase on activated carbon for phenolic effluent treatment 474

Davoust N, Persson A: Effects of growth morphology and time of harvesting on the chitosan yield of *Absidia repens* 572

Dilorio AA, Cheetham RD, Weathers PJ: Growth of transformed roots in a nutrient mist bioreactor: reactor performance and evaluation 457

Dilorio AA, Cheetham RD, Weathers PJ: Carbon dioxide improves the growth of hairy roots cultured on solid medium and in nutrient mists 463

Donaghy J, McKay AM: Extracellular carboxylesterase activity of *Fusarium graminearum* (Short contribution) 742

Druet D, El Abbadi N, Comeau L-C: Purification and characterization of the extracellular and cell-bound lipases from a *Penicillium cyclopium* variety 745

El Alami N, Boquien C-Y, Corrieu G: Batch cultures of recombinant *Lactococcus lactis* subsp. *lactis* in a stirred fermentor – I. Effect of plasmid content on bacterial growth and on genetic stability in pure cultures 358

El Alami N, Boquien C-Y, Corrieu G: Batch cultures of recombinant *Lactococcus lactis* subsp. *lactis* in a stirred fermentor – II. Plasmid transfer in mixed cultures 364

Engel H, Leeuwen AM van, Dijkstra A, Keck W: Enzymatic preparation of 1,6-anhydro-muropeptides by immobilized murein hydrolases from *Escherichia coli* fused to staphylococcal protein A 772

Evans PJ, Ling W, Palleroni NJ, Young LY: Quantification of denitrification by strain T1 during anaerobic degradation of toluene 136

Exterkate FA, Jong M de, Veer GJCM de, Baankreis R: Location and characterization of aminopeptidase N in *Lactococcus lactis* subsp. *cremoris* HP 46

Ferrer P, Solà C: Lipase production by immobilized *Candida rugosa* cells (Short contribution) 737

Fogarty WM, Brosnan MP, Doyle EM, Kelly CT: The carbohydrases of *Bacillus stearothermophilus* NCIB 11412 and NCIB 10814 191

Fourest E, Roux J-C: Heavy metal biosorption by fungal mycelial by-products: mechanisms and influence of pH 399

Fu JF, Chang RY, Tseng YH: Construction of stable lactose-utilizing *Xanthomonas campestris* by chromosomal integration of cloned *lac* genes using filamentous phage ϕLf DNA 225

Gallert C, Winter J: Comparison of 4-hydroxybenzoate decarboxylase and phenol carboxylase activities in cell-free extracts of a defined, 4-hydroxybenzoate and phenol-degrading anaerobic consortium 119

Garnham GW, Codd GA, Gadd GM: Kinetics of uptake and intracellular location of cobalt, manganese and zinc in the estuarine green alga *Chlorella salina* 270

Garnham GW, Codd GA, Gadd GM: Uptake of technetium by freshwater green microalgae 679

Granger LM, Perlot P, Goma G, Parailleux A: Kinetics of growth and fatty acid production of *Rhodotorula glutinis* 13

Griffiths DA, Brown DE, Jezequel SG: Biotransformation of warfarin by the fungus *Beauveria bassiana* 169

Groot WJ, Waldram RH, Lans RGJM van der, Luyben KChAM: The effect of repeated temperature shock on baker's yeast 396

Guchte M van de, Wal FJ van der, Kok J, Venema G: Lysozyme expression in *Lactococcus lactis* 216

Guoqiang D, Kaul R, Mattiasson B: Immobilization of *Lactobacillus casei* cells to ceramic material pretreated with polyethylenimine 305

Hadj-Taieb N, Chaabouni-Ellouz S, Kammoun A, Ellouz R: Hydrolytic efficiency of *Penicillium occitanis* cellulase: kinetic aspects 197

Hamad SH, Böcker G, Vogel RF, Hammes WP: Microbiological and chemical analysis of fermented sorghum dough for Kisra production 728

Hamdi M, Brauman A, Garcia JL: Effect of an anaerobic bacterial consortium isolated from termites on the degradation of olive-mill waste-water (Short contribution) 408

Hammack RW, Edenborn HM: The removal of nickel from mine waters using bacterial sulfate reduction 674

Hanson RL, Bembenek KS, Patel RN, Szarka LJ: Transformation of *Nε*-CBZ-L-lysine to CBZ-L-oxylysine using L-amino acid oxidase from *Providencia alcalifaciens* and L-2-hydroxyisocaproate dehydrogenase from *Lactobacillus confusus* 599

Hara T, Nagatomo S, Ogata S, Ueda S: The DNA sequence of γ-glutamyltranspeptidase gene of *Bacillus subtilis* (*natto*) plasmid pUH1 211

Harmsen HJM, Kubicek-Pranz, EM, Röhr M, Visser J, Kubicek CP: Regulation of 6-phosphofructo-2-kinase from the citric-acid-accumulating fungus *Aspergillus niger* 784

Hartmans S, Kaptein A, Tramper J, Bont JAM de: Characterization of a *Mycobacterium* sp. and a *Xanthobacter* sp. for the removal of vinyl chloride and 1,2-dichloroethane from waste gases 796

Hendriksen, HV, Ahring BK: Metabolism and kinetics of pentachlorophenol transformation in anaerobic granular sludge 662

Heuvel JJ van den, Raué HA: Translational efficiency of mRNA in yeast cells is not increased by plant viral leader sequences (Short contribution) 84

Hinteregger C, Leitner R, Loidl M, Ferschl A, Streichsbier F: Degradation of phenol and phenolic compounds by *Pseudomonas putida* EKII 252

Hoh YK, Yeoh H-H, Tan TK: Properties of β-glucosidase purified from *Aspergillus niger* mutants USDB 0827 and USDB 0828 590

Horn CH, du Preez JC, Kilian SG: Amylase production by a *Schwanniomyces occidentalis* mutant in chemostat culture 147

Hunik JH, Meijer HJG, Tramper J: Kinetics of *Nitrosomonas europaea* at extreme substrate, product and salt concentrations 802

Jager K, Harlander S: Characterization of a bacteriocin from *Pediococcus acidilactici* PC and comparison of bacteriocin-producing strains using molecular typing procedures 631

Jarzębski AB, Goma G, Soucaille P: A tentative physiological model of batch acetonobutylic fermentation 714

Kendrick A, Ratledge C: Lipid formation in the oleaginous mould *Entomophthora exitalis* grown in continuous culture: effects of growth rate, temperature and dissolved oxygen tension on polyunsaturated fatty acids 18

Kern M, Koch H-G, Klemme J-H: EDTA activation of H_2 photoproduction by *Rhodospirillum rubrum* 496

Khoury N, Dott W, Kämpfer P: Anaerobic degradation of phenol in batch and continuous cultures by a denitrifying bacterial consortium 524

Khoury N, Dott W, Kämpfer P: Anaerobic degradation of p-cresol in batch and continuous cultures by a denitrifying bacterial consortium (Short contribution) 529

Khowala S, Ghosh AK, Sengupta S: Saccharification of xylan by an amyloglucosidase of *Termitomyces clypeatus* and synergism in the presence of xylanase 287

Kirchner K, Wagner S, Rehm H-J: Exhaust gas purification using biocatalysts (fixed bacteria monocultures) – the influence of biofilm diffusion rate (O_2) on the overall reaction rate (Short contribution) 277

Kirk LA, Doelle HW: The effects of potassium and chloride ions on the ethanolic fermentation of sucrose by *Zymomonas mobilis* 2716 88

Kiy T, Tiedtke A: Mass cultivation of *Tetrahymena thermophilia* yielding high cell densities and short generation times 576

Knust B, Wettstein D von: Expression and secretion of pea-seed lipoxygenase isoenzymes in *Saccharomyces cerevisiae* 342

Kołek T, Dmochowska-Gładysz J, Siewiński A: Resolution of racemic 8,14-seco-4,9(11)-androstadiene-3,14,17-trione in a microbial-chemical way (Short contribution) 762

Kosinski MJ, Rinas U, Bailey JE: Proteolytic response to the expression of an abnormal β-galactosidase in *Escherichia coli* 335

Kremer SM, Wood PM: Continuous monitoring of cellulase action on microcrystalline cellulose 750

Lebrihi A, Lamsaif D, Lefebvre G, Germain P: Effect of ammonium ions on spiramycin biosynthesis in *Streptomyces ambofaciens* 382

Légier V, Comeau LC: Continuous synthesis of esters by cell-bound fungal lipases in an organic solvent 732

Lewis VP, Yang S-T: Propionic acid fermentation by *Propionibacterium acidipropionici:* effect of growth substrate 437

Lhomme B, Roux JC: Biomass production, carbon and oxygen consumption by *Rhizopus arrhizus* grown in submerged cultures on thin liquid films or immobilized on fibrous and particulate materials 37

Lier JB van, Grolle KCF, Stams AJM, Conway de Macario E, Lettinga G: Start-up of a thermophilic upflow anaerobic sludge bed (UASB) reactor with mesophilic granular sludge 130

Lippert K, Galinski EA: Enzyme stabilization by ectoine-type compatible solutes: protection against heating, freezing and drying 61

Lobas D, Schumpe S, Deckwer W-D: The production of gellan exopolysaccharide with *Sphingomonas paucimobilis* E2 (DSM 6314) 411

Machová E: Induction of aldose reductase and polyol dehydrogenase activities in *Aureobasidium pullulans* by D-xylose, L-arabinose and D-galactose 374

Mahmoudian M, Michael A: Biocatalysts for production of chiral epoxides 23

Mahmoudian M, Michael A: Stereoselective epoxidation of phenyl allyl ether by alkene-utilizing bacteria 28

Manolov RJ: Batch and continuous ribonuclease production by immobilized *Aspergillus clavatus* cells in a bubble-column bioreactor 32

Martegani E, Forlani N, Mauri I, Porro D, Schleuning WD, Alberghina L: Expression of high levels of human tissue plasminogen activator in yeast under the control of an inducible GAL promoter 604

Martin SA: Factors affecting glucose uptake by the ruminal bacterium *Bacteroides ruminicola* 104

Mauersberger S, Drechsler H, Oehme G, Müller HG: Substrate specificity and stereoselectivity of fatty alcohol oxidase from the yeast *Candida maltosa* 66

Menke B, Rehm H-J: Degradation of mixtures of monochlorophenols and phenol as substrates for free and immobilized cells of *Alcaligenes* sp. A7-2 655

Meyer JM, Hohnadel D: Use of nitrilotriacetic acid (NTA) by *Pseudomonas* species through iron metabolism 114

Meyer KM, Süssmuth R: Bacteriophage-resistance mechanisms examined by transfection of *Lactococcus lactis* subsp. *lactis* 4513-5 mediated by high voltage electroporation 235

Möller J, Niehoff J, Hotop S, Dors M, Schügerl K: The influence of preculture on the process performance of penicillin V production in a 100-l air-lift tower loop reactor 157

Mollah AH, Stuckey DC: The influence of H_2, CO_2 and dilution rate on the continuous fermentation of acetone-butanol 533

Muranaka T, Ohkawa H, Yamada Y: Scopolamine release into media by *Duboisia leichhardtii* hairy root clones 554

Nakano H, Kawakami Y, Nishimura H: Secretion of genetically-engineered dihydrofolate reductase from *Escherichia coli* using an *E. coli* α-hemolysin membrane translocation system 765

Neutra R, Levi BZ, Shoham Y: Optimization of protein-production by the baculovirus expression vector system in shake flasks 74

Ogata S, Matsubara H, Tawara Y, Tokunaga S, Hara T: Screening of compounds stimulating spore formation and mycelial growth of pock-forming plasmid-carrying strains in *Streptomyces azureus* (Short contribution) 652

Ohara H, Hiyama K, Yoshida T: Kinetics of growth and lactic acid production in continuous and batch culture 544

Ohba R, Kainou H, Ueda S: Production of purple pigment from green malt and dry malt grains by fermentation without steaming 176

Pakkanen R, Kanttinen A, Satama L, Aalto J: Bovine colostrum fraction as a serum substitute for the cultivation of mouse hybridomas 451

Passeri A, Schmidt M, Haffner T, Wray V, Lang S, Wagner F: Marine biosurfactants. IV. Production, characterization and biosynthesis of an anionic glucose lipid from the marine bacterial strain MM1 281

Patel RN, Liu M, Banerjee A, Szarka LJ: Stereoselective enzymatic hydrolysis of (exo,exo)-7-oxabicyclo[2.2.1]heptane-2,3-dimethanol diacetate ester in a biphasic system 180

Planas A, Juncosa M, Cayetano A, Querol E: Studies on *Bacillus licheniformis* endo-β-1,3-1,4-D-glucanase: characterization and kinetic analysis 583

Proksa B, Adamcová J, Fuska J: 2-Methylsorbic acid, an antifungal metabolite of *Penicillium vermiculatum* 443

Rättö M, Poutanen K, Viikari L: Production of xylanolytic enzymes by an alkalitolerant *Bacillus circulans* strain 470

Reiss J: Studies on the solubilization of German coal by fungi (Short contribution) 830

Rinas U, Bailey JE: Protein compositional analysis of inclusion bodies produced in recombinant *Escherichia coli* 609

Ríos S, Eyzaguirre J: Conditions for selective degradation of lignin by the fungus *Ganoderma australis* 667

Röthlisberger P, Fiechter A, Zimmermann W: Production of thermostable xylanases in batch and continuous culture by *Thermomonospora fusca* KW 3 416

Ronen Z, Bollag JM: Rapid anaerobic mineralization of pyridine in a subsurface sediment inoculated with a pyridine-degrading *Alcaligenes* sp. 264

Rüdiger A, Ogbonna JC, Märkl H, Antranikian G: Effect of gassing, agitation, substrate supplementation and dialysis on the growth of an extremely thermophilic archaeon *Pyrococcus woesei* (Short contribution) 501

Salcedo G, Ramírez ME, Flores C, Galindo E: Preservation of *Xanthomonas campestris* in *Brassica oleracea* seeds 723

Sarrette M, Nout MJR, Gervais P, Rombouts FM: Effect of water activity on production and activity of *Rhizopus oligosporus* polysaccharidases 420

Saucedo-Castañeda G, Lonsane BK, Navarro J-M, Roussos S, Raimbault M: Control of carbon dioxide in exhaust air as a method for equal biomass yields at different bed heights in a column fermentor (Short contribution) 580

Sayadi S, Ellouz R: Decolourization of olive mill waste-waters by the white-rot fungus *Phanerochaete chrysosporium:* involvement of the lignin-degrading system 813

Schmidhalter DR, Canevascini G: Characterization of the cellulytic enzyme system from the brown-rot fungus *Coniophora puteana* 431

Schmitt P, Diviès C: Effect of varying citrate levels on C_4 compound formation and on enzyme levels in *Leuconostoc mesenteroides* subsp. *cremoris* grown in continuous culture 426

Schrumpf B, Eggeling L, Sahm H: Isolation and prominent characteristics of an L-lysine hyperproducing strain of *Corynebacterium glutamicum* 566

Schürch, U, Cryz SJ, Lang AB: Scale-up and optimization of culture conditions of a human heterohybridoma producing serotype-specific antibodies to *Pseudomonas aeruginosa* 446

Schuppert B, Schink B, Trösch W: Batch and continuous production of propionic acid from whey permeate by *Propionibacterium acidi-propionici* in a three-electrode amperometric culture system 549

Seeboth PG, Warren RAJ, Heim J: In-vitro cleavage of a fusion protein bound to cellulose using the soluble yscF$_a$ (Kex2) variant 621

Shibui T, Nagahari K: Secretion of a functional Fab fragment in *Escherichia coli* and the influence of culture conditions 352

Shimizu S, Ogawa J, Yamada H: Microbial asymmetric hydrolysis of *N*-acetyl-1-methyl-3-phenylpropylamine to optically active 1-methyl-3-phenylpropylamine 164

Siimes T, Nakajima M, Yada H, Asama H, Nagamune T, Linko P, Endo I: Object-oriented fuzzy expert system for on-line diagnosing and control of bioprocesses 756

Slaughter JC, Nomura T: Autocatalytic degradation of proteins in extracts of a brewing strain of *Saccharomyces cerevisiae.* The role of endoproteinases and exopeptidases 638

Slininger PJ, Jackson MA: Nutritional factors regulating growth and accumulation of phenazine 1-carboxylic acid by *Pseudomonas fluorescens* 2-79 388

Sode K, Tatara M, Takeyama H, Grant Burgess J, Matsunaga T: Conjugative gene transfer in marine cyanobacteria: *Synechococcus* sp., *Synechocystis* sp. and *Pseudanabaena* sp. 369

Somkuti GA, Solaiman DKY, Steinberg DH: Expression of *Streptomyces* sp. cholesterol oxidase in *Lactobacillus casei* 330

Soni BK, Kapp C, Goma G, Soucaille P: Solvent production from starch: effect of pH on α-amylase and glucoamylase localization and synthetic medium 539

Spencer JFT, Spencer DM, Figueroa L de, Nougues J-M, Heluane H: Transfer of genes for utilization of starch (sta2) and melibiose (*mel*) to industrial strains of *Saccharomyces cerevisiae* by single-chromosome transfer, using a *kar1* mutant as vector 230

Spiker JK, Crawford DL, Thiel EC: Oxidation of phenolic and non-phenolic substrates by the lignin peroxidase of *Streptomyces viridosporus* T7A 518

Steinbüchel A, Pieper U: Production of a copolyester of 3-hydroxybutyric acid and 3-hydroxyvaleric acid from single unrelated carbon sources by a mutant of *Alcaligenes eutrophus* 1

Steinbüchel A, Wiese S: A *Pseudomonas* strain accumulating polyesters of 3-hydroxybutyric acid and medium-chain-length 3-hydroxyalkanoic acids 691

Stimberg N, Walz M, Schörgendorfer K, Kück U: Electrophoretic karyotyping from *Tolypocladium inflatum* and six related strains allows differentiation of morphologically similar species 485

Stovall ME: Interstrain spheroplast fusion of *Alternaria alternata* 480

Takamoto Y, Maeba H, Kamimura M: Changes in survival rate and enzyme activities in *Escherichia coli* with ozone 393

Tamponnet C, Ramdi H, Guyot J-B, Lièvremont M: Rabbit articular chondrocytes in alginate gel: characterisation of immobilized preparations and potential applications 311

Taylor A, Brown DP, Kadam S, Maus M, Kohlbrenner WE, Weigl D, Turon MC, Katz L: High-level expression and purification of mature HIV-1 protease in *Escherichia coli* under control of the *araBAD* promoter 205

Tebbe CC, Ogunseitan OA, Rochelle PA, Tsai Y-L, Olson BH: Varied responses in gene expression of culturable heterotrophic bacteria isolated from the environment 818

Thakker GD, Evans CS, Koteswara Rao K: Purification and characterization of laccase from *Monocillium indicum* Saxena (Short contribution) 321

Thiery I, Ofori J, Cosmao Dumanoir V, Hamon S, Barjac H de: New mosquitocidal strains from Ghana belonging to serotypes H3, H6 and H48 of *Bacillus sphaericus* 718

Tsen H-Y, Chen T-R: Use of the polymerase chain reaction for specific detection of type A, D and E enterotoxigenic *Staphylococcus aureus* in foods 685

Uozumi N, Kato Y, Nakashimada Y, Kobayashi T: Excretion of peroxidase from horseradish hairy root in combination with ion supplementation 560

Vasudevan N, Mahadevan A: Utilization of complex phenolic compounds by *Acinetobacter* sp. (Short contribution) 404

Venus J, Idler F, Albrecht C: New ways of selecting lactic acid bacteria for biotechnological processes 240

Vukelic B, Ritonja A, Renko M, Pokorny M, Vitale Lj: Extracellular α-amylase from *Streptomyces rimosus* (Short contribution) 202

Wilmańska D, Milczarek K, Rumijowska A, Bartnicka K, Sedlaczek L: Elimination of by-products in 11β-hydroxylation of Substance S using *Curvularia lunata* clones regenerated from NTG-treated protoplasts 626

Wilson CA, Wood TM: The anaerobic fungus *Neocallimastix frontalis:* isolation and properties of a cellulosome-type enzyme fraction with the capacity to solubilize hydrogen-bond-ordered cellulose 125

Yamaji H, Fukuda H: Growth and death behaviour of anchorage-independent animal cells immobilized within porous support matrices 244

Yanagi K, Miyoshi H, Fukuda H, Oshima N: A packed-bed reactor utilizing porous resin enables high density culture of hepatocytes 316

Yanase H, Matsuzaki K, Sato Y, Kita K, Sato Y, Kato N: Enzymatic preparation of [1-^{13}C]D-fructose-6-phosphate from [^{13}C]formaldehyde and D-ribose-5-phosphate using the formaldehyde-fixing system of *Methylomonas aminofaciens* 77a 301

Yu PL, Hodge RA, Li XP: In vitro expression of Lac-PTS and tagatose 1,6-biphosphate aldolase genes from *Lactococcus lactis* subsp. *cremoris* plasmid pDI-21 280

Zhou X, Traxler RW: Enhanced butanol production and reduced autolysin activity after chloramphenicol treatment of *Clostridium acetobutylicum* ATCC 824 293
